

keep it clean

Cross connections, an actual or potential connection between your potable drinking water and possibly contaminated water, are serious conditions that may constitute a public health hazard.

That's why approved backflow prevention assemblies are required by law to protect the public water supply in most municipalities and cities.

Most backflow devices last many years, but they usually require annual service and testing to maintain their integrity. These devices are tested at the time of installation and are often registered with the city or municipal authorities that are responsible for ensuring the safety of the water supply. There are exacting procedures required for the testing of these assemblies and we are trained and certified to both test and make any repairs as they are needed.

There are many different types of backflows that are needed for differing levels of protection, and as piping systems are installed, altered, or extended, the type of device required may change.

Sprinkler systems, heating systems, and agricultural uses all have different types of protection, to assure the maximum amount of safety, while still considering economy.

We can provide an evaluation or consultation if you have any doubts or suspicions about the suitability or serviceability of any backflow device.

Contact us today to find out how we can help.

National life safety and property protection

FIRE

- Control Panels (small, mid-sized and large system)
- Detection (Smoke detectors, Heat detectors, Fire Alarm Stations)
- Signaling (Horns, Strobes, Speakers)
- Graphic Annunciation
- Central Station Monitoring
- Linear Heat Detection
- Air Sampling detection systems
- Gas Detection
- Rapid Access Products

SIGNALING PRODUCTS/ DISTRIBUTOR PRODUCTS

- Audible Signals
- Visual Signals
- Hazardous Location Signals
- Fire Protection Equipment
- Clocks
- Security & Annunciation
- Pushbuttons, Transformers & Utility boxes

- Emergency Lighting & Exit Signs

SPRINKLER

- Sprinkler design, installation & maintenance
- Standpipes
- Fire pumps
- Antifreeze loops
- Kitchen Hoods
- Foam Systems
- Fire Suppression Systems
- Backflows
- Off Road Vehicle Suppression
- FDC Locking Caps

SERVICE

- Emergency service by certified manufacturer-trained technicians working with sophisticated inspection equipment and comprehensive skills

- Preventive Maintenance agreements that protect your investment and are tailored to your system
- Specialize in fire alarm inspection and repairs, sprinkler systems, backflow devices, fire pumps, central monitoring, security, fire extinguishers, nurse call, communications, emergency lighting, exit signs, and installation of rapid access products

SECURITY

- Access control
- Video surveillance
- Intrusion
- Network solutions
- Completely integrated systems
- Monitoring

NURSE CALL & COMMUNICATIONS

- Nurse call

- Emergency Call
- Wander Prevention
- Asset Tracking
- Access Control
- Emergency Voice Paging
- Intercom
- Commercial Sound
- Time Keeping
- Management Reporting
- Redundant Configurations
- Central Station Monitoring

MARINE FIRE & SAFETY

- Fire Protection Systems
- Alarm and Detection
- Portable and Fixed Fire Equipment
- Water Mist Systems
- Self Contained Breathing Apparatus
- Safety Equipment
- Fire Hose & Hydrants
