

always on call

Peace of Mind Solutions from your single source supplier

Edwards Sprinkler offers a full line of gas detection products, whether you require a fully engineered gas detection network or a more modest detection solution, we have fully customizable products guaranteed to meet your needs.

- Products that provide detection of all gases: carbon monoxide (CO), nitrogen dioxide (NO₂), hydrogen sulfide (H₂S), oxygen (O₂), methane (CH₄), hydrogen (H₂) and propane (C₃H₈)
- A new line of detectors that have removable sensors for easy swapping of different gases or bench testing

- Detectors are available in standalone, standalone with remote (dual gas mode) or network versions
- Connectivity options to analog or digital systems and working with virtually any BAS including BACnet and Modbus
- Connects to wired or wireless system (via 301CW wireless controller)
- Wall or duct mount
- Factory-calibrated cartridges

Edwards Sprinkler gives you peace of mind, knowing the occupants of your facility are protected. Contact us to learn more at sales@edwardssprinkler.com
